

INSPIRED BY ANATOMY

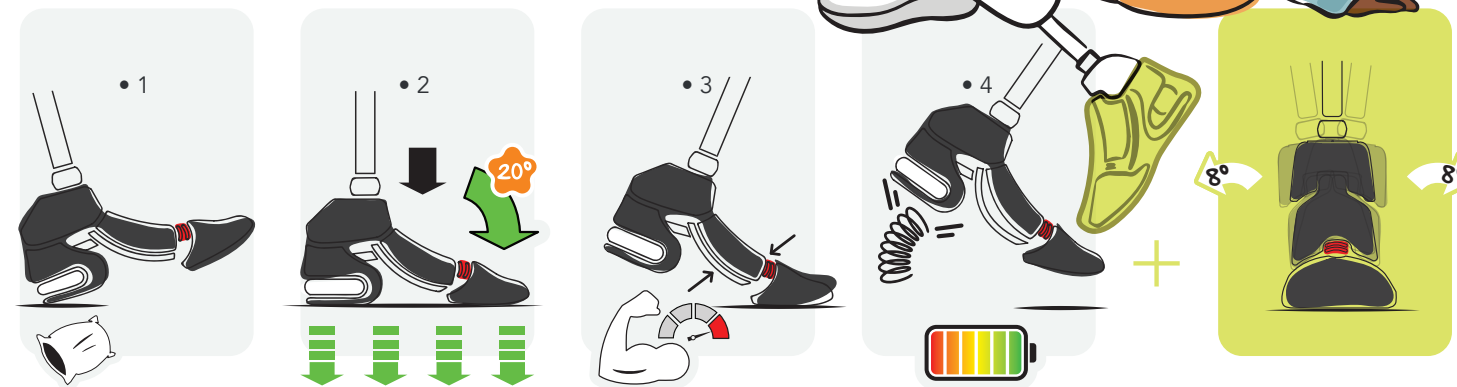

Exoneo's mission is to offer innovative and affordable prosthetic solutions for amputees. Our engineers inspired by biomimetics, invented a poly-articular prosthetic foot "Upya". This "copy" of the human foot allows the amputee to regain new walking sensations and have more comfort. Upya brings the dynamism needed to enjoy life on a daily basis.

Upya, an original movement for unrivalled sensations !

WALK WITH

upya by exoneo

«The heel strike is soft and comfortable, it's very pleasant!»

«Upya is very stable, it's reassuring and I feel more confident.»

«This forefoot flexion is incredible and gives new sensations!»

«The toe-off is easy, thanks to the energy accumulated by the fiberglass blade.»

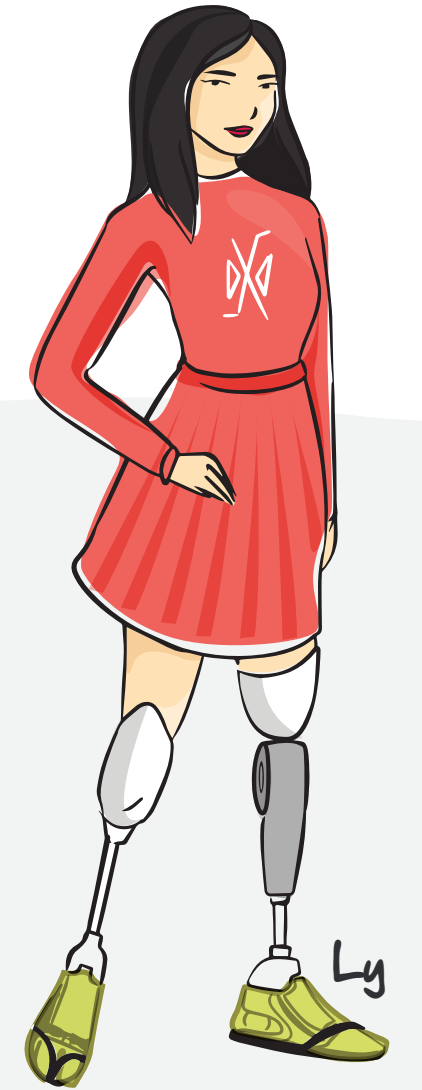

«Upya manages slopes and tilts well, so I don't have to worry about these areas anymore.»

Feel the joy of taking a step forward !

ADVANTAGES

- Recreates the natural movement of the foot
- Offers natural walking sensations
- Restores self-confidence
- Reduces pressure from the socket
- Same foot adjustable from 25 to 28 cm
- User weight from 50 to 110 kg
- For all types of amputations
- Made for use everywhere
- Economical and repairable
- Stretchable cover*; 2 skin colors & split toe
- Long lifespan

* The same cover is stretchable from 25 to 28 cm

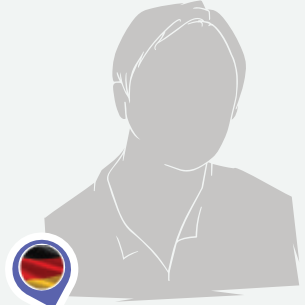

A pro's opinion

«This unusual articulation gives a real walking comfort !»

Yaoundé - Cameroun

«We in Germany are excited to offer the UPYA Foot to our customers, it offers various possibilities to patients to improve their wellbeing»

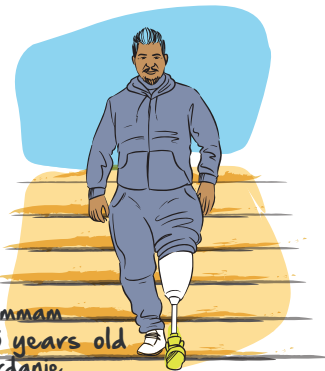

Schwabach - Germany

«The natural foot movement is a real benefit for the patient.»

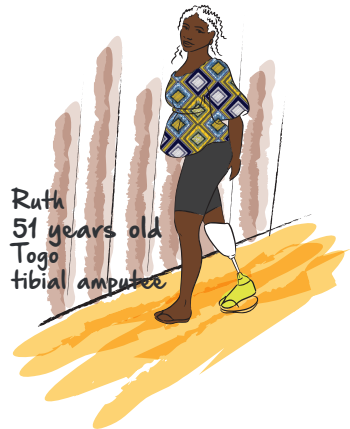

Tunis - Tunisia

The patient's feeling

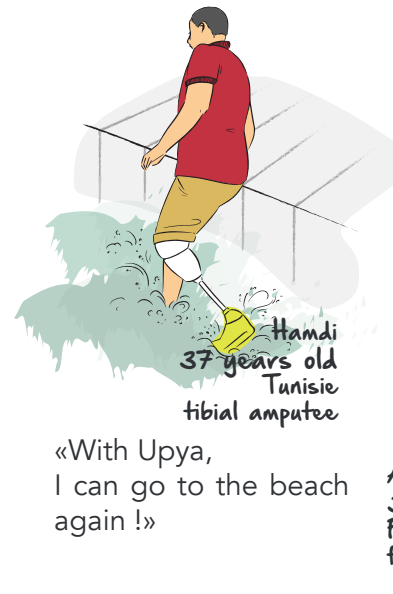

Hamman
35 years old
Jordanie
tibial amputee

«The pain is gone, and going up and down stairs is easy !»

Ruth
51 years old
Togo
