

Aspen Vista™ MultiPost Therapy Collar

CODE L0180 APPROVED

The Aspen Vista MultiPost Therapy Collar is designed with the goal to reduce symptoms associated with cervicogenic headaches, including occipital neuralgia. This unique device offers:

- A conservative, non-narcotic option
- Hot/cold therapy to help relieve tight muscles that entrap nerves
- A targeted NEWmatix System™ that promotes symptom relief
- Active treatment in only minutes a day from the comfort of home

Typically covered by Medicare and most insurances

Consequences of Poor Posture

Reading, computer work and cell phone use often contribute to poor neck posture. As your head moves forward out of alignment, gravitational forces are magnified causing neck muscles to overwork. For every inch that the head protrudes from its normal position, the neck must support 10 additional pounds of force (Dr. Adalbert I. Kapandji, author of "The Physiology of the Joints").¹

Active Influence Compression System

The Vista MultiPost Therapy Collar provides support to the neck to promote better posture. This more natural alignment may help to reduce symptoms² by taking the stress off vertebrae, discs and nerves. The hot/cold therapy pack directs the location of the compression to help reduce inflammation and unlock tight muscles, providing soothing relief.

An Innovative Feature Available only from Aspen

Pivoting Occipital Panels ^A
Padded panels offer an adjustable level of support in the occipital region.

Integrated Air Pump ^A
Easily accessible, the air pump and pressure release valve allow patients to quickly achieve the level of compression that works best for them.

One-Time Adjustment ^A
Once the Locking Strap on the left side is adjusted to the correct position, the patient can easily achieve the proper tightness and positioning when the collar is reapplied at home.

Active Influence Compression ^A
This device provides support to actively influence a more natural curve in the neck. Activating the NEWmatix™ System can aid in healing and help reduce symptoms by taking stress off the vertebrae, discs and nerves.

Targeted Therapy ^A
The Aspen Therapy Pack delivers hot/cold therapy to reduce inflammation and spasm. Moving its location inside the back panel focuses the targeted compression where desired.
