

VGK *by Orthomobility*

VGK-XS

VGK-XS

The world's first children's knee with the **same functionality** as **state-of-the-art** adult knees.

Safety

- Default stance
- Stumble recovery

Fluidic control technology

- Fluidic controlled stairs & slope descent
- Temperature & load compensation
- Optimised for low **weight** and **short build height**

Adjustments

- In-built **rotational alignment** of top & bottom adaptors
- Adjustable stance- & swing-phase properties
- Up to 3 yield modes (normal, high resistance, optional cycling)
- Socket delimited flexion
- Selectable swing-phase lock

P3 - 60 kg max bodyweight

21 cm build height

850 g weight
